

BB Imaging Finds an Office to Call Home

Austin, TX (September 1, 2021) — BB Imaging, a diagnostic ultrasound service provider, has a new home office in southwest Austin, TX. This is BB Imaging's first office after working virtually for all 16 years of its history.

An overwhelming need for connection spurred the addition of a physical workspace, even as many companies move to a virtual work setting. The non-clinical team of 3 has now grown to 20 members, and the new office will provide a setting for collaboration, creativity, and innovation. Local clinical team members will also be able to take advantage of the space for administrative tasks.

"We are thrilled to have a physical, branded space to call home," said Blanca Lesmes, CEO of BB Imaging. "Our company culture is positive and warm, and it's a pleasure to have a space that reflects those values and empowers our team to work together."

BB Imaging will look to grow into the office in 2022 as personnel growth continues for both the clinical and non-clinical teams.

About BB Imaging:

BB Imaging was founded in 2005 to bring excellent, compassionate, and complete ultrasound care to patients across a spectrum of needs. Through the development of working relationships with healthcare providers, BB Imaging services patients in a variety of settings and circumstances, including rural locations across Kansas, Missouri, Oklahoma, Florida, and Texas. BB Imaging's mission is to improve health outcomes by making high-quality ultrasound services accessible to all women regardless of their zip code or economic status.
